One of the problems about organizing a Festival at the end of a busy academic term rather than at the end of a vacation, is that - paradoxically perhaps? - while there are more people around in the weeks leading up to the Festival, fewer of them have time to spare to assist in the organization. So, while I have had endless encouragement from my colleagues at SOAS, few of them have been able to offer sustained help in these busy weeks. I am delighted, however, that many of them will be on hand during the Festival, and have offered their services as session chairs. Trevor Marchand, besides, with his customary enthusiasm, has organized the displays in the SOAS Library and the Lecture Theatre foyer, relating to the Festival and to aspects of Visual Anthropology at SOAS.

We have tried to get this Catalogue into print well before the actual Festival, with a view to sending out copies at least to local participants in advance. As I write this now, barely two weeks before the Festival, after numerous unpredicted but inevitable delays (late submissions of stills, last minute additions to the programme, software problems ...) there still seems some hope that we will be in print a week or so before the Festival. One thing this does mean is that I cannot produce a full list of those to whom we will, by the time of the Festival, have been indebted for assistance. I know that many more such obligations will have been - gratefully - incurred; but I am not able to acknowledge them here.

As Festival Director, however, I can write with confidence that the event would not have been possible at all without the contributions and support of certain key figures: notably, initially, Jonathan Benthal, Director of the RAI, and then his successor Hilary Callan. I am very much indebted to them and the other members of the Festival Planning Committee, Felicia Hughes-Freeland (the Chair), André Singer (in his role as Chair of the Ethnographic Film Committee), Lola Martinez (as Convenor of the Conference), and above all Gail Thakur for many things, but particularly as the repository of experience from previous Festivals. Roger Nuthall, Executive Officer in the Anthropology Department, has provided solid backup since the spring, and has dealt efficiently with several matters, notably the Registration process from the start. The Festival is indebted to the members of the Pre-selection Committee (listed elsewhere) for convening, in several cases at short notice, and in all cases at an awkward time of year, to review a large number of films in a short space of time: we worked hard, but we had a good time! We have all benefited regularly from the wise advice of other members of the RAI Ethnographic Film Committee (also listed elsewhere). This Catalogue owes its existence, in the first place, to the comprehensive drafting of Leila Jazayer, and in the final weeks, to the hard work and design skills of Alicia MacLean. In the planning stages of the Festival, Michael Baptista, Chief Technican at SOAS, has been most co-operative: we shall be relying very heavily during the Festival on the skills and efficiency of Michael and his staff.

Last - and by no means least - we are most grateful for the sponsorship provided by the National Geographic Channel, and by JVC Professional Products (UK) Limited.

Foreword

The first RAI Ethnographic Film Festival was held in SOAS in September 1985. Subsequent Festivals were held in Manchester (1990, 1992), Kent (1994, 1996) and Goldsmiths College, London (1998), and in 2000 the Festival has returned to SOAS. This provides an opportunity to review some of the changes since the first Festival.

The early 1980s were a time of exciting developments for ethnographic film in the UK and elsewhere. The first three biennial RAI Film Prizes were awarded (1980, 1982, 1984), attracting increasing interest from the major filmmakers in the field. The RAI had joined the Leverhulme Trust and the National Film School under Colin Young in a scheme of one-year Fellowships to train professional anthropologists as filmmakers at the School, and by the time of the first Festival the first two Fellows had just completed their project films. Television, meanwhile, had played a crucial role in encouraging the creative talents of ethnographically inclined filmmakers; several different series of “serious” ethnographic films had been established and had helped to mould the public image of our subject. Yet, in the UK at least, film was only beginning to establish itself as a respectable focus for study in a university anthropology department.

The Festival was intended to celebrate some of these developments. It was largely planned and organized by Jonathan Benthall (Director of the RAI), Chris Curling (filmmaker and member of the Film Committee), and myself as local organizer, assisted by Karen Godden (RAI Directorors Secretary). We had a generous grant from UNESCO, which allowed us to bring a number of filmmakers to the festival who would not otherwise have been able to come, and also enabled us to charge a very low admission fee. The festival showcased winners of previous RAI Film prizes, films made by the first RAI/Leverhulme Film Fellows, and new films by prominent directors, several of whom, including David MacDougall and Robert Gardner, attended the festival.

In subsequent years, the RAI Film Committee reflected on the experience of the first Festival and on whether and how to repeat it. Several new developments led to the second Festival in 1990. After the 1985 Festival, Robert Gardner generously endowed a second Prize, to be named the Basil Wright Film Prize. Screenings of films short-listed for the RAI Prize and the first Basil Wright prize were held in 1986 at SOAS, but were not made the occasion for a further Festival. In 1988, with the successful launch of the Granada Centre for Visual Anthropology at Manchester, the screenings for the prizes were held there, and it was decided to plan for a second Festival, to be hosted at Manchester in 1990 and to coincide with the screenings of the next Prize competitors. By 1990, there were two further prizes on offer, the JVC Professional Student Video Prize, and the discretionary Material Culture and Archaeology prize funded by the RAI Film Committee.

The second Festival, generously supported by Granada TV, established two traditions: the screening and adjudication of films submitted for the prize competition, and a concurrent academic seminar. These traditions were maintained in subsequent Festivals up to and including the Sixth, held in Goldsmiths College. In a subsequent review of the Festivals to date, and the market for them, the Film Committee decided that the link between the Festival and the Prizes (now four of them) was the strongest justification for the Festival, but that it was time to de-couple the Festival from the accompanying Conference: many people had complained in previous years that they had felt torn between watching movies and attending Conference sessions.

So, the Conference was separated from the festival, both in timing and in organization. This having been decided, a perennial problem had to be addressed: the timing of the Festival. There was no time of the year that was not difficult for some important constituency of regular or potential participants. After much discussion of alternatives, some of which were preferable but unavailable, December 2000, after end of the academic term, was finally agreed on. Apart the problem of the expensive run-up to the Christmas and New Year holidays - some of the disadvantages of this timing from the point of view of the organizers, though predicted, have become increasingly obvious: notably, the three-month run-up to the Festival has coincided with a busy academic term.
Foreword

Less predictable has been the impact of organizational changes at both the RAI and SOAS, to which I have been inclined to attribute our failure to raise substantial sponsorship support for the Festival, though there are undoubtedly other wider factors outside our control which it would be fairer to blame.

Other decisions that had proved difficult for previous festival organizers were less so on this occasion. Should the programming be thematic? When the Festival is focused around prize screenings which are not thematic, there seems no point in trying to force them into other categories; we decided to leave the Conference thematic, and let the Festival character be determined by the submissions. If there are clashes of interest, in that two or even three films on a similar theme are being screened simultaneously, then I can only say that we tried to avoid this, while drawing participants’ attention to the Video Library, where all films submitted for the Festival are available for viewing throughout the Festival.

Then there was the issue of screening format. In 1985, where we had just the one screening venue, all films were projected in 16mm. In 2000, filmmakers were asked which format they preferred if their film was selected for screening (except entrants for the JVC Professional Student Video Prize, where VHS was the standard). With very few exceptions, they preferred Beta SP - which meant that we had to hire equipment which SOAS does not yet own. In future, as more filmmakers shoot and project in digital formats, and as digital projection becomes more standard at Festivals - and in cinemas around the world - we anticipate a move in that direction. Meanwhile, one has to note a continuing problem with incompatible video systems (esp. NTSC vs PAL).

A final personal note. The year 2000 - and this Festival - marks the SOAS Anthropology Departments 50th anniversary, which we have celebrated previously in other major events this year. The Department has always had a major interest in Visual Anthropology. Our founder, Professor Christoph von Führer-Haimendorf (1909-1995), was among other things a pioneer visual anthropologist. Some of his photographs can be seen in the displays associated with the Festival; his Archive is been collected at SOAS (a preliminary descriptive list is available).
He was also a prolific ethnographic filmmaker, starting to film in the 1940s. A number of his films were used for BBC television documentaries, such as *The Land of the Gurkhas* (1957) and *The Land of the Dolpo* (1962). His films have already been catalogued by Professor Alan Macfarlane of the University of Cambridge. We plan eventually to make some of them available, digitally or otherwise. We have been using film regularly as part of our teaching programme since the early 1970s. In 1985 I inaugurated a BA course unit in Anthropology and Film, which is also now available in an MA version. Meanwhile, in collaboration with colleagues in other Departments at SOAS, we have been developing a strong programme in Asian and African Media and Film Studies. Our MA in Anthropology of Media is in its third year and going well, other MAs, for example in World Cinema, are being developed, and we are already taking MPhil/PhD students to do research on film studies.

Festival Director
Introduction to the Festival

The RAI International Festival of Ethnographic Film is one among a number of festivals which take place on an annual or biannual basis in countries all over the world. Each ethnographic film festival has its own character, as two European examples demonstrate. The festival held at the IWF in Gottingen, Germany is an occasion in which a substantial number of student films are selected for a competition. All the other films are selected to stimulate discussion and explore filming styles, rather than meeting criteria of excellence. The festival held in Nuoro (Sardinia), in the Ethnographic Museum, has no special student category. The prize goes to the film which best captures the theme of the festival, such as “Magic and Medicine”, “Ritual and Music” or, this year, “Children”. Unlike most ethnographic film festivals, there is no time limit placed on the films, so the Nuoro festival is always a good opportunity to revisit old favourites and make new discoveries among past productions as well as seeing new work. The out-of-competition screenings at Nuoro usually include a retrospective of Italian documentaries, some of which are about Sardinia. Those of us with experience of film festivals all agree that the one at Nuoro gains top prize for its hospitality, as provincial funding covers board and lodging of delegates throughout the festival and there are usually two banquets during the five-day programme.

The RAI festival lacks the generous state support made available in Sardinia, but it has limited funding available to help bring over a filmmaker from a developing country. It also provides an opportunity to see different categories of films made by students and more established filmmakers, both in and out of competition. Delegates to the RAI festival are able to vary their viewing between parallel screenings of films which have been chosen because they are considered to be potential competition winners, and films which are shown in non-competitive screenings because they are of interest. Every film that was originally submitted to the different competitions is available for viewing in the video library, whether it has been selected for screening or not.

Despite rumours that new technologies are making ethnographic film redundant, the number of submissions received by the Festival this year exceeded that received in previous years. We were sent 47 films for the student category and 70 films for the other prizes (RAI, Basil Wright, and Material Culture).

A Note from the Chair of the RAI Ethnographic Film Committee

The RAI Film Committee has faced a year of unparalleled changes in the world of ethnographic film. New technology, new methods of delivery, refreshingly new methods of capturing imagery, lower costs for equipment and a greater acceptance of the visual medium as part of anthropological research are just some of the elements that have contributed to an exciting and challenging time for those of us who believe in the importance of film as a means to both study and disseminate ideas and information. The Film Festival is an important means of showing some of the quality and variety of achievements produced over the past two years. There are prizes for deservedly outstanding films to be awarded, but these should not detract from our praise and admiration for what all the contributors to the Festival have provided; namely an extraordinary insight into society through the sensitive eyes of the visual anthropologist or filmmaker. The Committee would like to thank all participants for both making and submitting their work to the Festival.

### Divorce Iranian Style

This film is set in the Family Law Courts in central Tehran. The four main characters are Massy, who demands divorce on grounds of her husband’s impotence; Jamileh, who punishes her husband for beating her; Ziba, a 16-year old girl who is wants a divorce from her 38-year old husband; and Maryam, who is fighting for custody of her daughters. The film moves away from portraying Iran as a country of war, hostages, and fatwas. It concentrates instead on ordinary women who come to this court to try and transform their lives.

### Earl’s Canoe: A Traditional Ojibwe Craft

In this film we meet Earl Nyholm, a member of the Ojibwe Nation, as he walks through the woods on Madeleine Island, Wisconsin. He is looking for just the right birch tree to select for the bark which will be used in the making of a traditional Ojibwe canoe. He talks about the respect that the Ojibwe people have for nature and for the spirit of the particular tree used in the making of the canoe. The film follows the entire process involved in making the canoe.

Of Men and Mares

This film shows life and work on two farms in Zeeland, a province in the Netherlands. Here, some farmers, for different reasons, have chosen to keep on working with horses of the Belgian 'Underbred' race. These huge and heavy horses, with their calm and friendly character, were traditionally used in this region because of the heavy clay. Nowadays, all farmers, except for a small group of stubborn horse-lovers, have switched to the tractor. The film interweaves the story of the farmers with the life cycle of the horses. As the story develops, the specific interest of each separate farmer: breeding, horse-show or workpride, becomes clear.

100 Years: Greenland on Film

The Inuit Eskimo are probably one of the most misrepresented people in the world, stereotyped as a peaceful people living in harmony with nature. This misrepresentation has been greatly contributed to by filmmakers in the past 100 years, in films ranging from Peter Eiffelt’s "Ride with Greenland Sledge Dogs" (1896) to Billie August’s "Smilla's Sense for Snow" (1997). This film focuses on the contribution of such films to Greenland's historical development over the past 100 years.

Le Maitre a Dit Que...

In Muslim-inhabited areas of Cameroon there is still a lot of opposition to formal education. This film is about Chehou, a Muslim and a teacher in Tekel, a small poly-ethnic and multireligious village, where cattle herding and farming are the dominant ways of life. Only one-third of the village children go to school. The film follows Chehou as he arranges meetings and gives Koran classes in order to convince more parents to enrol their children in the school.

Building Season in Tiebele

The buildings of the Kasena are impressive testimonies to our world architecture. The compound, inhabited by several families, was originally constructed as a defence enclosure and now unites technically perfect edifices of high aesthetic value. During the dry season, new houses, granaries and stairways are built and old ones repaired. This film demonstrates the different building techniques used, and the concerns of the compound’s inhabitants over its future in view of political and economic developments.

A Mysterious Death

Set in a fishing village in southern Ghana, this film traces the events following the sudden death, at the age of 45, of Kote, an electrician for the Ghanaian army. The villagers know that such a death is most likely to be the result of a curse, but the precise cause must be established before the funeral can take place. So the ancestors are consulted, as is the dead man himself in the spirit world. The film concludes with the building of an appropriate coffin, in this case a giant screwdriver.

Special Screenings - Iranian Documentaries

Three Ethnographic Documentaries on Iranian Women by Ebrahim Mokhtari

The films from Iran that have won so many awards in the 1990s in the major world Film Festivals are almost all features. A common - and much admired - characteristic of these Iranian films, particularly features by Abbas Kiarostami, Mohsen Makhmalbaf and Samira Makhmalbaf, is the way they play on the boundaries between fiction and documentary. Many of the best known directors cut their teeth on documentary. Less known outside Iran are filmmakers specializing in documentary - the most prominent of whom is Ebrahim Mokhtari (b. 1947). Mokhtari has filmed in many parts of Iran and Iranian society, and on both lyrical and political themes; here we present three of his most recent documentaries, set in different parts of rural Iran, and all with a distinctly 'ethnographic' character.

Mokarrameh, Memories and Dreams

Mokarrameh, a widow in rural northern Iran, had deep affection for her cow. One day her children sold it without telling her. Her great sorrow moved her to start painting. She paints on the walls of her house, on pumpkins ... One of her sons, who lives in Tehran, visits her once a month to bring paper and paint. She goes on painting. Every painting tell a story: of her life, of her husband’s other wives, of other women in the village, their work ...

Mollah Khadijeh and the Children

Engaging and gentle portrait of Khadijeh, an elderly widow living in a village near Yazd in central Iran, who holds daily classes in summer - when School is out - for small boys and girls, teaching them to read the Koran. A dedicated teacher, she supports her young charges emotionally, and is supported in turn by their families. The film follows the class out from her house and yard, to the orchards nearby. Once school has restarted, one of the pupils brings food to lonely Khadijeh, who persuades him to stay and share her meal.

Special Feature Presentation: Himalaya
The film will be introduced by Mick Csaky, UK Co-Producer (and Producer & Director of GEIKO GIRL, screening elsewhere in the Festival).

Academy Award nominated for Best Foreign Language Film, this tale of an epic crossing takes place amidst the perilous trails of the vast Himalayan mountains and rich Nepalese valleys. Against the cold, the wind's fury and the snowstorms, tragedies unfold and ancestral hatred separates the village's Romeo and Juliettes. In the course of events from rage to triumph, the film tells a universal story of power, pride and glory.

Search for the Sons of Abraham
The Lemba, a tribe of black Africans living in Southern Africa, claim to be Jewish. Anthropologist Tudor Parfitt joins forces with a team of geneticists to trace their ancestry from South Africa via Zimbabwe, Mozambique and the Yemen, all the way to Israel. There they make a remarkable discovery - the Lemba share a rare gene with descendants of the Cohenim priesthood. Is this evidence that the Lemba are indeed the sons of Abraham?

Thomson of Arnhem Land
In the 1930s, tensions between the government and the indigenous peoples of Australia's north were on a knife-edge. Donald Thomson, an anthropologist, volunteered to go to Arnhem Land to make peace. For over two years, he lived with the Aboriginal people, forging strong bonds, learning and recording their way of life. His report to the government was ignored and he was ostracised by politicians and fellow academics. Now, his extraordinary photographs, field notes and artefacts are considered one of the most significant ethnographic collections in the world.
